ARTIVIO

Your smart AI companion for your trading life

Problem Statement

Artivio came into the world because we saw the following problems

1. The increasing number of web3 projects and the fast trend make it difficult for investors or traders to find potential projects.
2. Many systems provide web3 investment or trading trend data, but it is very difficult for novice traders to understand and search for the data one by one.
3. It is challenging for novice traders to find out the information that exists and spread across the trader community network.
4. Beginner traders need friends who can provide the latest information in an easy-access way so they can learn and be helped to make decisions
5. Traders need a system that can be a conversation partner and provide intelligent access to their needs.
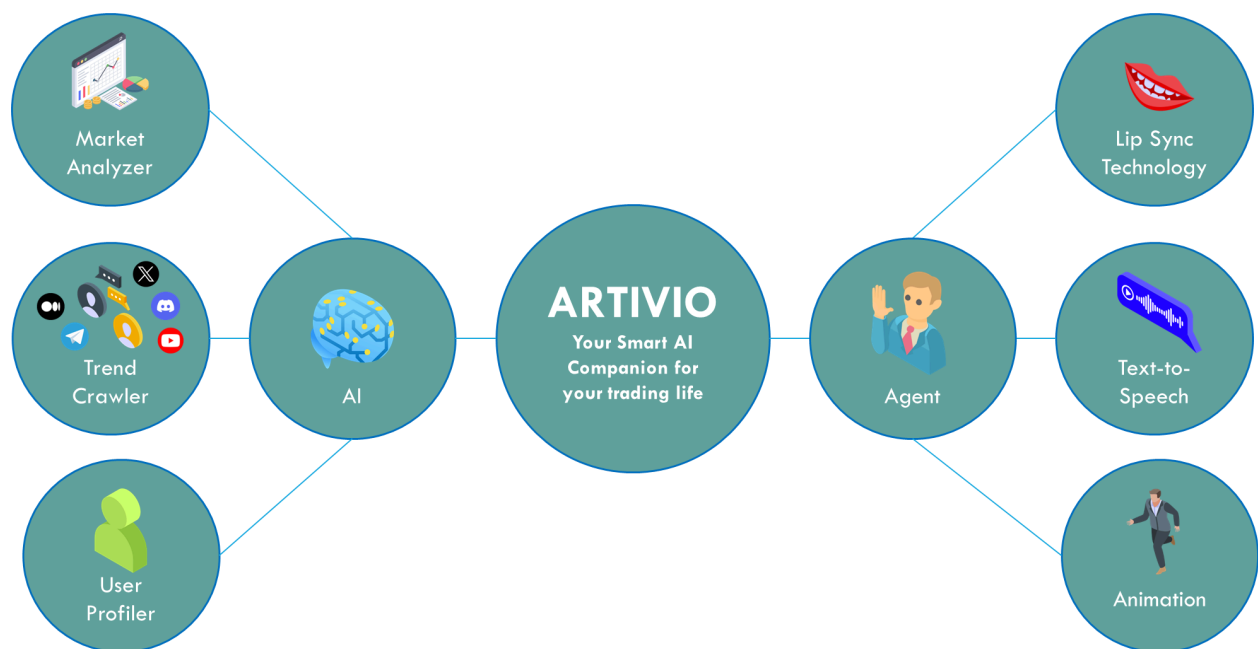

The Solution → ARTIVIO

Forget about tedious and eye-sore activities when looking for potential trending web3 projects that pop up every day, week, and month. Forget about the rows of data that you always track and calculate for your trading activities. Imagine if you had a friend who was always there every day to discuss daily life, casual, romantic matters, and even help you make investment decisions in the crypto world. ARTIVIO will erase all your worries and give you a better day!

ARTIVIO is an AI companion system created to make it easier for you to organize trading plans, especially in the world of crypto trading. ARTIVIO is built by combining AI and visual creative technology so that you not only have a companion to help you find information, make decisions, but also a friend for your daily life.

ARTIVIO TECHNOLOGY

ARTIVIO built by a combination of generative AI text and visual animation. Apart from that, ARTIVIO also has a data crawling and analysis system specifically for filtering trend data from various sources. With this capacity, ARTIVIO can be developed into semi-robo trading which not only helps discussions, but also helps manage your trading needs.

ARTIVIO TEAM

ARTIVIO is built by a team who have experience in the blockchain, AI and immersive technology industries, and supported by many experienced visual artists.

ARTIVIO Features

ARTIVIO is designed to be a robust companion for investors, leveraging a powerful infrastructure to capture market snapshots, track social media trends, and retain knowledge tailored to individual preferences. The avatar representations in ARTIVIO utilize advanced technology stacks to ensure natural and engaging conversations. These include lip-syncing, text-to-speech, and animation capabilities.

ARTIVIO Snapshot

ARTIVIO's core infrastructure is built to:

- Capture Market Snapshots: Provides real-time updates and insights into market movements.

- Track Social Media Trends: Monitors relevant social media activity to inform investment decisions.

- Retain Investor Knowledge: Customizes information based on investor preferences and behaviors.

ARTIVIO Avatar

The avatar representations in ARTIVIO are developed using several advanced technologies to create a seamless conversational experience:

- Lip-Sync Technology: Ensures that avatar movements match spoken words for a more realistic interaction.

- Animation: Enhances the visual appeal and expressiveness of avatars during interactions.

ARTIVIO Natural Conversation

Experience the future of communication with ARTIVIO Natural Conversation. Leveraging cutting-edge AI technology, ARTIVIO generates lifelike audio output that mimics human speech with astonishing accuracy. Our advanced algorithms ensure fluid, natural-sounding dialogue that adapts to context and tone, making interactions feel truly immersive. Create realistic virtual assistants, and produce high-quality audio content with ARTIVIO Natural Conversation.

AI Alerts

Stay ahead of the curve with AI Alerts, your go-to solution for instant notifications on market movements and emerging trends. Powered by sophisticated AI algorithms, AI Alerts delivers real-time updates with pinpoint accuracy, ensuring you never miss a critical development. Whether you're monitoring financial markets, tracking industry trends, or staying informed about the latest innovations, AI Alerts provides timely, relevant insights tailored to your specific interests.

Privacy Guard

Take charge of your digital footprint with Privacy Guard, the ultimate solution for managing your personal data. Privacy Guard empowers you with unparalleled control over how your information is used and shared, providing peace of mind in an increasingly connected world.

Universal Access

ARTIVIO is developed using web-based technology, ensuring seamless embedding and integration across various platforms. This guarantees constant companionship and support for users, regardless of the device or operating system you are using.

Getting Started with ARTIVIO

To begin your journey with ARTIVIO, simply add our Telegram Bot and launch the app. You can start talking to your virtual companion. Experience the future of investment assistance and enjoy the continuous support of ARTIVIO's intelligent infrastructure.

ROADMAP

Q3 2024 - ALPHA PHASE

- ARTIVIO web version
- Chat feature
- Visual creation feature
- AI Sound integration
- Optimizing data crawling

Q4 2024

- Developing smartphone version (Android and iOS)
- Gamification feature - Coin Utility
- Optimizing infrastructure and architecture

Q1 2025

- Beta Launch - (Web browser and Smartphone)
- AI - Group Chat feature (limited)
- Developing robot functionality
- Developing group AI - agents activity features

Q2 2025

- Robot functionality
- group AI-agents functionality
- Optimizing architecture and system

TOKENOMICS

TOKEN SUPPLY: 1,000,000,000

90% Liquidity Supply

5% Staking Reward

5% Development and Marketing

UTILITIES

ARTIVIO has a vision to make all traders in the world have a reliable AI companion or friend whatever their stage is. The smart AI text generative function combined with AI - visual and audio optimization technology will make ARTIVIO learn by itself.
